

# Smart Sensor AP388 Gas Leackage Detector with Alarm Gas Tester LPG and NG Detector

## Description

- Sound & Light Dual Alarm:** when the gas detector senses that combustible gas content exceeds the 500PPM , it will beep sounds and red L-ED lights up to warn.
- One Button for Use:** you just need to power on, wait its self-test/warm up, ready for use, put the gas detector near test position, finally judge gas leakage result with L-ED indicator and beep sound, very easy.
- Light Weight, Portable Size:** pen type design gas detector, comfortable to grip, with solid durable shell, not heavy, not big, can be easily stored or conveniently taken to anywhere, used anytime.
- Wide Range Of Application:** this gas detector, powered by 2 × AA , features precise detection to reduce of gas leak, energy-saving auto-off, suitable for gas pipelines' maintenance, household use, etc.

- Specifications:**
- Material: Plastic
  - Color: Black
  - Detection Gas: Natural Gas (GAS-CH4), Liquefied Gas (LPG)
  - Self Detection After Turn On: < 25s
  - Response Time: < 20s
  - Detection More Than 500PPM (CH4 Methane): Red L-ED Light
  - Triggered Indicator: Red L-ED Light, Beep Sound
  - Malfunction Indicator: low L-ED Light
  - Low Indicator: Flash Green L-ED Light
  - Working : 0°C-40°C
  - Working Humidity: Relative Humidity 10%~90%RH
  - Power Supply: 2 \* 1.5V AA (NOT Included)
  - Item Size: 263\*36\*36mm / 10.35\*1.41\*1.41in
  - Item Weight: 60g / 2.11oz
